

THE EMPRESS EXPRESS

VOLUME XVI. No. 36

EMPRESS, ALTA. THURSDAY, Feb. 7, 1929

Price: \$2.00 Per Year

United Church

The Church School, 2:00 p.m.
Public Worship, 7:30 p.m.
The service will be under the auspices of the I.O.D.E. and we hope a large number will attend. We welcome you.
Rev. Geo. A. Shields,
Minister.

DOLORES DEL RIO A DELIGHT IN "RAMONA"

"Ramona" was written by Helen Hunt Jackson with a purpose. She did not know at the time of writing the story that it would go down in history as one of the great American classics.

"Ramona" is a tale of early California—the days of the Mission Indians—their trials and their tribulations. And "Ramona" came into being during that period. The story is filled with love life interest, Mrs. Jackson, while probably not realizing it at the time, drew one of the most beautiful love stories in American literature when she painted this tale of the half Indian maiden who is in love with two men one of them the Indian, "Alejandro," played on the screen by Warner Baxter; the other, "Felipe," the Spanish Don, Roland Drew.

To Edwin Carewe should go another triumph and notch in his belt of directorial triumphs, and to Miss Del Rio should go the unstinted praise that is due only to a great artist. Her portrayal of the Italian maiden was divine and in some instances even surpassed her remarkable characterization in "Resurrection" which proved once and for all that this Mexican beauty was in the film world to stay as long as she might choose.

Next Wednesday is Ash Wednesday, and Thursday, February 14, is St. Valentine's Day.

SCHOOL SCRIBBLERS
and other School Supplies and Requisites. You will find our stock is most complete.

EMPRESS DRUG CO.

McAulay-Carson

Toronto, Feb. 5.—At the parsonage of Carlton Street United church, by Rev. K. Crossley, Hunter, a quiet wedding was solemnized when Miss Edith Jane Carson, of Dundalk, Ont., became the bride of Mr. Hugh McAulay, of Empress, Alberta. After a wedding trip they will reside at Empress, Alberta.

Hugh McAulay and his bride, arrived from Toronto on Wednesday and are taking up their residence on the bridge grounds, farm south of town. We join with citizens generally in extending best wishes and congratulations to the happy couple.

World's Tallest Flag Poles

The University of British Columbia has the second tallest flag pole in the world. It is made from a single stick of British Columbia fir and measures 206 feet from the ground to the ball at the top.

This pole comes from the same forest from which was cut the great pole presented by the province to Kew Gardens, London, England, twelve years ago, which towers 214 feet in the air and is said to be the tallest in the world.

Instead of the cold weather helping to suppress the "flu" epidemic, apparently it has intensified it. Colds and general sickness seem to be more prevalent than ever.

DINNER TIME

Watch your food and watch health. Health is but a wise man's wealth.

Health is wealth and you get your money's worth in this restaurant. Wholesomeness abides in this, the home of modern dishes with the old-fashioned flavor.

White Lunch

Good Meals at Popular Prices Give us a trial when in town.

N. Frappier, proprietor

Passing Away of Valued Citizen; An Impressive Funeral Service

There passed away early on Sunday morning at his home here, Henrietta Boyd, wife of Marcus G. Boyd. She was one of our earliest settlers and was well known throughout town and the district generally for her sympathetic and generous impulses. Her death is keenly felt and came rapidly after a brief illness, cause being pleural pneumonia. She was 51 years of age. Services were held in the United Church on Tuesday at 2 p.m., conducted by Rev. Geo. A. Shields. The church was packed by sympathizing friends and neighbors. The ceremony was an extreme, by touching one. Favorite hymns were rendered by choir and congregation, and a duet by Miss Barnett and Mrs. E. McCune. A mass of floral tributes surrounded the casket, a testimony to the wide-spread regard and esteem in which she departed one had been held. At the conclusion of the service those present passed their sorrowful way out of the church, taking one last fleeting look at the still features of their former neighbor and friend.

Interment was made in the Empress cemetery in the presence of immediate members of the family and friends. Henrietta Reilly, daughter of John and Mary J. Reilly, was born March 9, 1877, at Sydenham township, near Owen Sound, where she spent all of her girlhood life. She was married to Marcus G. Boyd in 1903; they came west, making their home near Froude for eleven years. They came to Empress in 1913, when the town started. Besides her husband, she leaves to mourn her loss her daughter, Opal Eileen (Mrs. K. McNeill), and son, Harold Elliott. Three brothers: Henry, of Guelph, Ont.; James, of Griffls, Ala.; John G., of Los Angeles, Cal. Three sisters: Mary J., Elizabeth and Margaret E., of Winnipeg. Nurse M. Reilly, was the only relative from a distance present at the funeral. Mrs. Governor of Calgary, was among the chief mourners. Floral tributes were received from:

Ladies of Congregation
Ladies of I.O.D.E.
Mr. and Mrs. C. R. Moore and Mr. Mrs. J. N. Anderson.
Mr. and Mrs. Geo. Leach; Mr. and Mrs. S. Tyler, Miss Mildred Hutchinson; Mr. and Mrs. Granger, Calgary; Mr. and Mrs. J. Nelson and family, Trecho.
Mr. and Mrs. M. L. Haggins, Mito.

Sudden Death of Geo. World

The death occurred at 6 a.m. today of Geo. World, farmer south west of town, near to Bindloss. Mr. World underwent a critical operation on Tuesday. His sudden death is a great shock to the community. He has been married but a brief while. Whole-hearted sympathy is felt for Mrs. Geo. World in her bereavement.

Funeral service will be held on Sunday, at the United Church, Empress, at 1 o'clock.

Tommy Johnston, hotel-keeper of Sceptre, passed away here on Friday morning. When brought here, for medical attention, it was recognized that his condition was hopeless, and he only survived a few hours. He was an army veteran and had been service abroad and we are informed held a captaincy. His body is being held here pending arrival of instructions from relatives in England. He was a good hotel man, and was popular with travellers and community of town and district in which he lived.

Baby Snowdon passed away suddenly today.

Valentine Tea Poisoned

A St. Valentine's tea will be held on Saturday, February 9, from 2 to 6 p.m. in the United Church school room under the auspices of the Junior C.G.I.F. This event has now been postponed to a later date.

Mrs. and Mrs. J. D. Rogers and Mr. P. C. Rogers.
Mr. and Mrs. Wm. Ellis.
Mrs. Sexton, Kathleen and Mr. Hankin.
Mr. and Mrs. R. L. Arthur and family.
Mr. and Mrs. J. C. Craile, R. T. Thornhill, Calgary.
Miss Dagmar Gladbeck, Mito.
Mr. and Mrs. D. McEachern and Mr. Mrs. McEachern.
Mr. and Mrs. W. A. McNeill, Mito and May, Saskatoon.
Mr. and Mrs. Don, MacLain and Mr. and Mrs. N. McCune and family.
Empress School Staff.
Mr. and Mrs. Wendell MacLain.
Mr. and Mrs. J. J. Stouck, Calgary.
Mrs. Mackie and family.
Mr. and Mrs. Tom. Paul.
Mr. and Mrs. N. D. Storey and Mr. and Mrs. David Lush.
Norris and Willard Storey.
Mr. and Mrs. W. R. Brodie and family.
Mr. and Mrs. E. H. Fountain and family.
C.G.I.F.
Allan Van Cleve.

Is Taken Care Of Under Vagrancy Charge

Fred Hadmer, who was found wandering in the Altus district without visible means of support and in danger of being frozen was picked up by Cuns. Barnes and taken to Bassano. He appeared before Police Magistrate Bond and was given 30 days on a vagrancy charge.

"Ramona" with Dolores Del Rio as the star, has been made into a glorious film production by Inspiration Pictures and Edwin Carewe, and United Artists will show the picture at the Empress Theatre this week. Causew drafted the story. It is said to be the most successful achievement before the cameras.

It is well within the range of possibility that automobiles would draw their power from a central wireless station and pay for the power used according to charges registered by a meter. If it were applied to automobiles, the step would be short to trains, steamships, and airplanes.—Christian Science Monitor.

Mortgage Sale of Valuable Farm Property

Under and by virtue of the Powers of sale provided by the Land Title Act, under a certain mortgage which will be produced at the time of the sale.

Tenure will be offered for sale by public auction at the front of the Hotel in the Town of Empress in the Province of Alberta, on Saturday, the 16th day of February, 1929, at the hour of 2 o'clock in the afternoon, the following property, namely: The South-East Quarter of Section Thirty-four (34), in Township Twenty-three (23), Range Two (2), West of the Fourth Meridian, containing 160 acres or less: EXCEPTING and RESERVING such exceptioning and reservations as are expressed in the existing Certificate of Title or may be implied in connection therewith.

Terms of the sale to be 20 per cent. cash at the time of the sale, and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a small reserve bid and free from all encumbrances save taxes for the current year.

The vendor is informed that the above property is situated about 10 1/2 miles from Empress and that there are one line of fence and barn; half-mile two wire fence.

For further conditions and particulars of sale, apply to McLeod, Robertson, Winter and Edmundson, Solicitors for the Plaintiff, Calgary, Alberta.

DATED at Calgary, this 13th day of December, 1928.
MCMLEOD, ROBERTSON, WINTER & EDMUNDSON,
Vendor's Solicitors.

Your
Personal
Car

How seldom the family car is at your disposal. But a personal car, ready at your command, is both a pleasure and convenience. A car that you can drive confidently in traffic, that you can park in an extremely short space, that responds to your lightest touch, with more speed than you will ever need. And above all perhaps in your estimation, a car so smart and distinguished in appearance that it gives a little thrill every time you see it parked, burnished and gleaming, waiting for you. The New Ford.

Make Empire Products Popular

Mark of Origin On British Goods Will Interest Canadian Consumers

The evident growing interest in Canada in the subject of inter-imperial trade will invite a good deal of attention to the campaign of the Canadian Manufacturers' Association to bring about the adoption of a mark of origin to be placed on goods produced within the Empire. This movement seems to be gradually taking a more concrete form and we have received, in this connection, a copy of a letter which has been directed by the Canadian Manufacturers' Association to the British Empire Producers' Organization.

The British Empire Producers' Organization is given an opportunity in this letter of approving of one of the most successful marks "it," it is set forth, "acceptance of the general principle of the utility and value of such a mark by representative organizations in different parts of the Empire can be obtained and some one mark approved for voluntary use by the producers and manufacturers in the British Empire, it is readily conceivable that it would find willing and generous support. In addition, it is proper use would tend to obviate numerous irritations between different Empire countries, which are, should not permanently exist between countries standing in material and/or several relationships to one another."

The matter of a mark of origin on British goods is not only a good deal of interest to Canadian business men but also to the great army of consumers, who are becoming increasingly discriminating in their purchases. — Regina Daily Post.

A Record Building Feat

Stone Bridge Replaced By Iron Structure In Rapid Time

A remarkable engineering feat was carried out in one day in connection with the completion of an \$80,000 road and bridge across the River Linton, Haddingtonshire, England. It is to meet the great growth of motor traffic on the Great North Road along the route to London. While railway traffic was diverted on the Midland route via St. Bevels to Berwick, a stone bridge was demolished and replaced by an iron bridge standing alongside was wheeled into position on trolleys, fixed and completed within sixteen hours and the railway relaid.

Would Be Sure Cure
Wife (discussing Christmas present for son): "I want to avoid anything in the way of tobacco, as I don't wish to encourage him to smoke too much."

Husband (absently): "Get him some cigars like those you gave me last year, and I shall be surprised if he gave up smoking altogether."

Alberta Turkeys Shipped East
Twenty-four hundred turkeys — some of Southern Alberta's best — have been billed east to Montreal by the Southern Alberta Co-operative Association. The birds were hand picked and should maintain this district's reputation for choice turkeys on the eastern markets. One hundred and fifty shippers contributed to this consignment.

Mining Volcanic Dust
Volcanic dust beds thirty feet thick have been worked from deposits near Waldeck, eleven miles northeast of Swift Current, Saskatchewan.

An old saying that has about gone out of use:—"You can't do that more than you can fly."

Our Dumb Animals

Analysis Of Mental Capacity Of Dogs And Other Domesticated Pets

Men have always been interested in what their brothers in the animal family think about and how their minds work. Many books, fiction and fact, have been written on the subject. All sorts of animal stories, from the Jungle Books and "The Call of the Wild" to "Lady Fox" and "Hamil," find eager readers. Alfred Poulton in the Revue Bleue, has written an interesting article, "Reflections on the Mind of the Dog." He says, "A dog, he says, has a clear conception of what his mission on earth is to attach himself to the master that destiny has given him, to guard him and his house, to follow him in his walks, his hunts or his wars. He is even keen enough to discern who is the real master in a house. If he sees that the man is not, he gives his allegiance to the mistress, in that the proper disposition of the house may not be challenged. When animals display such a high degree of intelligence, it seems strange to many that they should not be able to talk. M. Poulton remarks, 'Why should they talk?' But yourself, says he, 'in the place of a dog, a cry of joy, a groan, a shout of alarm, more or less intense, more or less prolonged—doesn't that convey all that is necessary in most cases?' To be vigilant, to learn the meaning of every change of expression, to give slightest indication enough to give the dog a thorough understanding of his master. He has no need for words. Moreover, the technical business of disciplining an action from the being who performs it is beyond him. To distinguish between the good and the bad is more than he can manage. It would be interesting to know what the master of the Fellow—the dog who bears the vocabulary of the words—would have to say to this."

While the French writer displays a certain sympathy for all dumb animals, and quotes cases of the loyalty and devotion of cats, dogs, deer and rabbits, he apparently has no sympathy for the monkey. Everything about the monkey, "thanks to his unhappy genius for imitation, becomes a horrid buffoonery, a perpetual derision of man and of his most noble sentiments." Monkeys are not liked by the French. They are, however, which are most attracted to man show the greatest repugnance for the monkey tribe. The physical repugnance between man and monkey, M. Poulton consolesly remarks, may be, after all, only fortuitous.—New York Times.

Indian Sign Language

Many Of These Signs Used By People Every Day

When Americans, Frenchmen, Italians and Chinese meet in Germany, they show their ignorance of each other's language by failing completely in their efforts to engage in conversation. Hundreds of years ago, with no newspapers, books, schools or colleges, the representatives of different nations were able to converse intelligently through the medium of the Indian sign language—even though they did not understand a single spoken word of each other's language. The sign language is remarkably easy to learn. In fact, we make use of dozens of the signs constantly without realizing that they are old Indian signs. The crooked forefinger beckoning the two-year-old, in the Indian sign for "Come." A pointed fore-finger means "You." Height expressed by raising the right hand a certain distance from the ground—something that we often do unconsciously. If you are taking up the language from one end of the country to the other, should you see a couple of uniformed chaps making rapid signs and laughing understandingly, do not take them for deaf mutes. They are merely talking in America's first language and demonstrating one more accomplishment of the Boy Scout personnel.

Noble Planter Women

Empire building is generally believed to be a man's work, but in addition to the great legion of frontiersmen there is a greater legion of noble, adventurous women and near the head of the roll must be found the name of Mrs. Jane Walker, who helped her husband, half a century since, to build a home on the unnamed spot around which the great city of Calgary has grown.—Calgary Alberta.

We heard the other day of a steampship which has grown so refined that she says her Uncle Abner is elevating him in Tennes.

Fairness In Politics

A Wholesome Example Is Set Which Many Could Follow With Profit

Hon. Simon Tolmie, Conservative premier of British Columbia, came to Ottawa the other day to discuss British Columbia's natural resources with Rt. Hon. Mackenzie King, Liberal premier of Canada. On Wednesday night, as Premier Tolmie was stepping into a Pullman car to take him back home, a reporter accosted him and said the following: "Going to get home for Christmas?" Mr. Tolmie was asked. "Yes, sir," the premier replied, "even 'ole Christmas morning." "And are you taking back a nice little Christmas box for British Columbia in the way of a return of her resources?" "I've been liberally treated by the federal government, and I'm going to give them credit when I get home. They were fair and reasonable."

"That's a welcome note to politics—a note of fairness toward opponents. Premier Tolmie, with a mind as transparent as pearly in a brook, brook, hale and hearty, was treated fairly by Premier King—'even 'ole Christmas morning.' Tolmie, who is a sportsman and a fair clean fighter, to have said anything else. He simply applied to a political transaction the ethics that would have guided him in any other transaction. In doing so he set a wholesome example all should try to follow.—Ottawa Journal.

Competition Will Continue

Trade and Wealth Will Take Place Of War To Denote Power

The outburst of War is not going to remove the present international competition for power. But power is going to be expressed in terms of trade and wealth instead of terms of territory. The struggle will take the form of creating wealth rather than of destroying life. The nations of the world are now in the line of battle, and of tanks, and of guns and battalions immovable—consumers and not producers. While a military force will remain essential and indispensable, the protection for national trade and industry will be the mainstay of an efficient population, well fed, well clothed, well housed, and well led.

Seemed Unnecessary

Little Johnny had never known his Uncle Toby to spend a few days with them before, and when he removed his hat he started laughing because his uncle was bald.

"What's the joke, Johnny?" asked his uncle.

"Why, tee hee hee! mother put a brush and comb in your room!" uttered Johnny.

Millions Spent On Christmas Cards

A writer in the current North American Review reveals that the American public pays \$55,000,000 a year for its Christmas cards. There are forty factories in the trade, employing some 5,000 workers. Designs are guarded as jealously as possible.

In Italy and California man is using natural steam from volcanic power stations.

LIKES LIFE IN NORTH

For the first eight months of 1928 Canada exported milk and milk products to the value of \$15,622,512.

For the first eight months of 1928 Canada exported milk and milk products to the value of \$15,622,512.

For the first eight months of 1928 Canada exported milk and milk products to the value of \$15,622,512.

Increase In Mental Cases

Canadian Institutions Caring For Thousand More Than Last Year

With approximately 25,000 patients confined in mental institutions at the close of 1928 as compared with approximately 24,000 at the beginning of the year, increasing attention is being paid to the problems of mental hygiene by Dominion and provincial governments and by social welfare organizations.

It is estimated that all persons in need of mental treatment attended to there would be 25,000 more in institutions than there are. The number actually under treatment is limited only by the capacity of hospitals and the funds available. As it is, the bed-space of mental hospitals in Canada exceeds that of the general hospital.

During the past year several important steps have been taken in connection with mental hygiene work. The Lady Willingdon fund for research has reached \$750,000, of which \$500,000 has been contributed by governments and individuals in Canada, and \$100,000 by the Laura Spelman Rockefeller Memorial Foundation. All of this fund is to be spent on research within the next five years.

The province of Saskatchewan this year established the first provincial department of mental hygiene under the department of health. This department in addition to the administration, is carrying on research work in co-operation with the University of Saskatchewan.

Mental hygiene work in Canada received a stimulus during the year from the report of a royal commission set up by the British Columbia government to study the matter, recommending a very progressive program.

A similar commission, composed of Dr. C. M. Hinks and Dr. C. B. Farrer, is now conducting an investigation for the province of Alberta. The Alberta legislature at the 1928 session took the advanced step of enacting the first sterilization law in Canada. It provides for sterilization of mentally deficient persons who may be discharged from institutions.

Answer This One

A farmer, visiting his son's college and wandering into a chemistry class, saw some students busy experimenting.

"What are you trying to do?" he asked.

"We're endeavoring," replied one of the students, "to discover or invent a universal solvent."

"What's that?" asked the farmer.

"A liquid that will dissolve anything."

"That's a great idea," agreed the farmer. "When you find it, what are you going to keep it in?"

He? Can I see you across the street?"

She (solicitly): "Why ask me? Don't you know how far you can see?"

The Mystery Of Mars

Dominion Observatory Studied This Planet During Recent "Opposition"

Probably no heavenly body has aroused the interest and imagination of the public at large so much as the planet Mars. Popular interest in this planet has been kindled by the discovery of the so-called "canals" and every twenty-six months, when the earth and Mars approach to within a relatively short distance of each other, this interest wells up anew. At the 1928 "opposition," as it is called, the closest approach occurred on December 13, at a distance of about 54 million miles. For some considerable time before and after that date the planet was in a favourable position for observation. It is best observed in low latitudes where it culminates near the zenith. At Ottawa the planet is somewhat too far south for the best conditions, but the Dominion Observatory devoted some time to its study during the recent "opposition."

Seen through a powerful telescope under good atmospheric conditions many varied and some puzzling features can be seen by a keen-eyed observer. The most conspicuous of these are the vast "desert" areas, which cover by far the greater part of the planet's surface, and whose reddish-orange color gives them a characteristic ruddy hue. Next come the "blue-green" areas, whose color is quite probably due to vegetation. These blue-green areas which border the planet north and south of the equator, was and was in visibility with the marlin seas, changing from green to blue as the spring and summer months advanced. These tracts were sea, and they are still sometimes known by that name, though it is now known that there are large permanent areas of water on Mars. There is also much less atmosphere than on earth and comparatively little cloud.

Crossing both deserts and seas, in an apparently geometrical network, is the "canal" system. "Canals" is somewhat unfortunate, and is due to a faulty translation of the Italian word "canali." Schiaparelli, the discoverer of these markings, took them to be straits, or channels, connecting the seas, and applied the Italian word for canals. A student of Mars is inhibited by intelligent creatures, has been one of the principal causes of popular interest in this neighboring world. Professor Lowell's views have made some headway, and it is now generally accepted that, in addition to vegetation, some of the lower forms of animal life may exist; the possibility of the existence of intelligent beings, however, there is considered to be grave doubt.

The "canals" are dusky markings, the appearance of which the servers are not wholly agreed. Some of them are as geometrical network of extremely narrow and well defined lines, connecting each other at various spots called "oases," and covering the whole planetary disk; to others again, while the pattern is much the same, they appear as hazy streaks. Some observers, even experienced ones, are unable to see them at all; the objective result is at least a considerable number of them has however been demonstrated by photography. At the Dominion Observatory the more prominent ones are being mapped and their peculiarities studied; their appearance tallies well with previous observations made elsewhere.

Surrounding the planet's poles are white caps of snow and ice. These regularly wax and wane with the marlin seasons; the growth of vegetation and the appearance of the "canals" seem to be connected with them, as though they depended on moisture liberated by the melting of the polar snows for their existence.

Mars was once thought to be extremely cold, but the most recent observations indicate that its temperature is comparable with that of the earth, though somewhat lower; the nights are probably much colder due to the smaller atmospheric blanket and consequent greater radiation. Many explanations have been put forth to account for the "canals." What is seen is most probably vegetation growing along lines where moisture is relatively plentiful. Why moisture should be plentiful along such geometrical-appearing lines it is difficult to say. At each "opposition" the "opposition" the other problems are brought up with vigour, but the mystery of Mars is still as intriguing as ever.

Will Tour Canada

Forty South African students will tour the United States and Canada during this month on the invitation of the National Student Federation of America. They will visit New York, Washington, Chicago, Detroit, Buffalo, Montreal and Boston. Percy Davies, of the University of Alberta, has charge of the Canadian plans.

Prince Of Wales' Names

The capital names of the Prince of Wales are seven and constitute a species of stately glorification. They are Edward Albert Christian George David and refer in their order to grandfather, paternal great-grandfather, paternal great-grandfather, and the patron saints of England, Scotland, Ireland and Wales.

Believe Me, Min, when it drives anyone mad.—Der Brummer, Berlin.

Increased Fertility Of Soil

Idea Of Honolulu Sugar Planter Promises To Be Important

Whether or not Doctor Malthus enunciated a great truth when he said that population always tends to increase to the very limit of subsistence, man, by means of scientific discovery, ingenuity and observation, is continually extending these limits and so postponing at least the evil day that Malthus foresaw.

The latest experiment for increasing the fertility of the soil comes to us from the Hawaiian Islands, and it is one of the most curious of all man's achievements in that direction. It appears that a sugar planter of Honolulu, Mr. Charles F. Eckart, was the original experimenter, who had the idea of using heavy strips of paper between the rows of cane as a kind of mulch. The result really worked; he got a much larger crop of sugar than he had ever before. Then some of his neighbors caught the idea and began to try it in their sugar fields—with even greater success. Of course our Department of Agriculture heard of it—it hears everything that is being done anywhere in the interest of farming—and it began to experiment still further with the scheme.

On the department farms at Arlington, Virginia, a number of ordinary garden crops were planted between strips of heavy black mulch paper. The results were astounding. Cucumbers so treated increased their yield 500 per cent, beets 400 per cent, green beans 300 per cent, corn and potatoes 75 per cent. Cotton also responded to the experiment and produced almost a double crop. The results were astounding. Farmers and market gardeners ought to know about it. With almost no trouble, they may be able to come near doubling their production of vegetables, and perhaps of other crops.

Altogether a most interesting discovery, this, and one that promises to be of real importance.

Demand For Cultural Languages

German and French Taught Largely For Cultural Value

Canadian universities are holding the prejudice against the German language, according to Prof. W. A. Braun, professor of German at Columbia University, who was graduated from the University of Toronto in 1880, and is attending the conference of the American Association of America, held in Toledo.

"Strangely enough," he said, "England was the first country to state its prejudice. It is the sporting spirit of England. Next came the United States."

Expressing his opinion of the lack of cancellation in Canada, Professor Braun gave as an outstanding reason the fact that Canada was a small country and its losses in the war were therefore more keenly felt.

"German and French are taught principally for their cultural value," Prof. Marcel Henri Vigener, of New York University, Canada was rather important from the commercial standpoint. It goes to show that the cultural languages are more in demand.

Prince Of Wales' Names

The capital names of the Prince of Wales are seven and constitute a species of stately glorification. They are Edward Albert Christian George David and refer in their order to grandfather, paternal great-grandfather, paternal great-grandfather, and the patron saints of England, Scotland, Ireland and Wales.

Will Tour Canada

Forty South African students will tour the United States and Canada during this month on the invitation of the National Student Federation of America. They will visit New York, Washington, Chicago, Detroit, Buffalo, Montreal and Boston. Percy Davies, of the University of Alberta, has charge of the Canadian plans.

WORLD HAPPENINGS BRIEFLY TOLD

The preparatory commission for a disarmament conference has been convened to meet at Geneva on April 15.

Dr. J. D. Maclean, former premier of British Columbia, has taken an important part in the federal department of finances at Ottawa.

At a meeting of the selection committee in Winnipeg, Lawrence C. Bonycastle was selected as Manitoba Rhodes scholar for 1920.

English "with no American tinge" will be the world dominating language, Professor R. Dybowski, of Poland stated at the Modern Language Association met, in Toronto.

Hubert Kipping celebrated his 63rd birthday on his estate "Batesman" and the following day died in celebration of his wife's 63rd birthday. Both days were spent quietly.

President Emilio Portes Gil believes that prohibition would benefit Mexico but he will attempt to wean the people from alcoholic beverages by distraction and education rather than by a sudden and severe law.

A new record for grain exports was established by the port of Montreal during the 1928 navigation season, when 202,575,831 bushels were exported, an increase of 37,608,814 bushels over 1927.

The well-known London chemist, Hilton Jones, announced recently the discovery of a new gas, to which he called it "interstitial solution." Jones said the gas causes decomposition with the slightest inhalation.

Two new passenger steamers for the Canadian Pacific steamship night service between London and Victoria have been ordered in London. The new boats are to be delivered in 1930, and will each have sleeping accommodation for 435 passengers.

The annual Lewis gun competition of the Dominion of Canada Rifle Association has been won by the gun team representing "B" Company, Governor-General's Foot Guards, of Ottawa. It was announced at Ottawa. The competition was participated in by entries from units throughout the Dominion.

Concludes Greatest Year

Production in B.C. Industries Breaks Quarter Billion Mark.

The year 1928 was by far the greatest in the history of British Columbia. The production of the province's four great industries—mining, agriculture, fishing and lumbering—has broken the quarter billion mark.

A conservative estimate, based on preliminary returns so far available to the government, would place the output at \$251,200,000, an increase of \$8,977,335 over the total for 1927, but final returns, especially from the lumber industry, may easily boost this a million or more.

More Effective Danger Signs

A. Houston, Texas, sign says our danger signs are based on the wrong psychology.

"Tell a man to 'Stop, Look, Listen' and he is impelled to do none of the three."

H suggests the following railroad crossings:

"Come ahead. You're Unimportant."

"Try our engines. They satisfy."

"Don't stop. Nobody will miss you."

"Take a chance. You can get it by a train only once."

Copper In Northern Canada

The deposits of copper ore in the Arctic region of Northern Canada, although at present inaccessible, possibly constitute one of the great copper reserves of the future.

Grimstones and Pulpoctons

There are in the Maritime Provinces about seventy quarries from which grimstones and pulpoctons have been furnished.

A Famous Navigator

Plans Being Made At Coast For A Monument To Capt. Vancouver

Plans are being laid to raise money in Vancouver for the erection of a statue in honor of the famous captain who gave his name to what is now the biggest seaport on the American Pacific coast. Says the Vancouver Province, "We cannot emulate the imposing scheme of the Statue of Liberty. We cannot hope to spend a million dollars on our Captain Vancouver as the United States has spent on their 315-foot high lady of the torch. But our Captain Vancouver should stand a memorial and a symbol, guarding our local habitation and our name, rising out of our sea, to be a witness for us that we have or them that laid our foundations. It should stand somewhere at the entrance of the harbor, in a high place looking down upon the ships as they pass, a landmark for the mariner by day, and a beacon light by night, visible far out in the Gulf."

Mexican Reporters Wear Pistols

It is as commonplace in a Mexican newspaper office for a reporter when he goes down to his desk to take off his pistol and cartridge belt as it is in the United States for a news hound to remove his coat when he starts to write. Almost every reporter here carries a pistol, as do most men whose work requires them to be abroad at night as well as a great many who have not that excuse for their armament.

Briquetting Plant

New Fuel To Shortly Appear On The Saskatchewan Market

After more than nine years, during which more than a million dollars was spent in plant equipment and experimentation, a new fuel is shortly to appear on Saskatchewan markets.

It was March 20, 1918, that the order-in-council was passed which gave the required authority for the setting up of the Lignite Utilization Board of Canada. That body worked for almost a year in an effort to produce a briquette from the vast store of lignite in southern Saskatchewan, concentrating on a vast plant at Bismarck.

The original vote was for \$100,000, the federal government supplying half and the Saskatchewan and Manitoba governments supplying one-quarter each. After that fund was exhausted Manitoba dropped out and Saskatchewan and the federal government, carried on. The grand total by governments, many thousands of which went into experimental equipment that had to be discarded, was \$1,036,800.

When it appeared that the whole was to prove a failure and governments hesitated over putting up more money, British capital became interested and the money was agreed to spend another large sum in experimental work at the plant, and, if successfully, to take over the plant for one dollar. Ernest Barry, generally considered the ranking industrial chemist in the British Empire, was placed in charge and, following to strict advice, has produced a type of briquette that is considered successful in every way.

FAMOUS CATTLE BREEDER

M. J. Tinline Efforts Western Canadian Society For 1929 +

M. J. Tinline, superintendent of the Dominion Experimental Farm at Brandon, was elected president of the Western Canadian Society of Agronomy for the season 1929. The society met in the University at Saskatoon.

Dr. J. B. Harrington, of the University of Saskatchewan, was elected vice-president.

Other officers are: Secretary-treasurer, Dr. O. S. Amond, department of field husbandry in the University of Alberta; executive, B. M. Simonds, of the Dominion plant pathology laboratory, Saskatoon; and Dr. R. Newton, of the field husbandry department, University of Alberta. Honorary presidents are the heads of the three universities. Dr. W. C. Murray, University of Saskatchewan; Dr. J. A. McLean, University of Manitoba; and Dr. C. Wallace, University of Alberta.

Improvement Shown In Pigment Situation

December Figures Better Than Any Previous Year On Record

The seasonal contraction in employment recorded at the beginning of December was on a smaller scale than on the same date in most of the last nine years, and the situation continued better than on December 1 in any previous year on record.

Statements were tabulated by the Dominion bureau of statistics from 6,600 firms employing 984,723 persons, compared with 1,000,229 in the preceding month; the index stood at 100.0, compared with 100.0 on November 1, and 100.0 on December 1, 1927.

Visitor (surveying room): "This is—er—hardly what I was led to expect from your advertisement."

Landlady: "Well, you ain't equipped. I thought you was from your letter."

Hon. J. D. MacLean Appointed Federal Farm Loan Commissioner

Ottawa.—Hon. J. D. MacLean, former premier and minister of finance of British Columbia, has been appointed federal farm loan commissioner to administer the act providing for long-term mortgage credit for farmers.

In making the announcement, Hon. J. A. Robb, minister of finance said: "The appointment is one where the office sought the man and not the man the position. It was desirable that the commissioner have a broad knowledge of Canadian conditions also an understanding of provincial finances. The latter is important as the act provides for contributions by both the Dominion and provincial governments. In the person of Dr. MacLean these qualities are to be found in large degree, and the office was tendered to him. He accepted and is now on his way east."

The minister added that it was anticipated that the Dominion government in Ottawa would not be large as the act provides that subsidiary boards be established to function within various provincial bounds, and the operations of these boards will be one of the questions to be discussed by the Farm Loan Board, the chairman of which is the Minister of Finance. Provinces which have passed the necessary enabling legislation are: Nova Scotia, New Brunswick, Quebec, Manitoba, Alberta and British Columbia.

Cold Hits Southern Europe

First Heavy Storm Of Winter Cause Several Deaths

Paris.—Many deaths were reported in Southern Europe, particularly France, struggled against the first severe storm of the winter.

Trains were delayed, shipping impeded and many roads and mountain passes made impassable by rains and snow which in most instances were accompanied by high, violent winds. Four persons died of the cold in Paris and two deaths were reported from Lyons.

The Algerian packet boat Governor Jonaud, arriving at Marseilles, reported that three passengers were washed overboard during a storm on the Mediterranean.

A Youthful Heroine

Iroquois, Ont.—Charleston Lake has an exceedingly youthful heroine in Mary Allen, four, who succeeded in pulling her two-year-old sister, Fern, out of the waters of the lake after she dropped through in the ice.

To Tour Canada

Ottawa.—Sir Wilfrid Laurier, next month hopes to visit Winnipeg and also Quebec, and then in the spring make an extensive tour across the Dominion to Vancouver.

Resolutions Urge The Establishment Of Air Mail Service

Calgary, Alta.—Resolutions requesting that the post office department should establish an air mail service in Western Canada connecting all the principal cities, and that the Dominion Government should help to bear the expense of lighting the ports, which would result from air mail service, were passed at the air conference held here, at which seven western cities were represented.

Tariffs for both visiting planes and those with headquarters in these cities were arranged, and the post office laid down a uniform policy with regard to companies and private individuals taking leases for accommodation on municipally owned aerodromes.

Final control of all municipally-owned airports will remain in the municipalities. It was decided, even though the cities hand over the administration of the flying fields to official aero clubs.

The following were present: Mayor F. E. Osborne and Commissioner A. C. Graves, representing Calgary; Mayor A. U. G. Hury, of Edmonton; Commissioner J. Leslie, of Saskatoon; T. J. Emerson, of Moose Jaw; Mayor E. Bullock, of Medicine Hat. Regina was represented by George M. Bell, of Calgary, while Emil Sick,

Vancouver Adds To Official Population

Suburbs Have Been Absorbed By Coast Metropolis

Vancouver.—The pandemonium which welcomed the New Year also marked the beginning of a new Vancouver. This city added some 80,000 to its official population at the last stroke of 12. The hitherto separate municipalities of Point Grey and Vancouver South merged with Vancouver proper to form one metropolis with a population of 220,883, according to figures drawn up in a survey completed in December, 1927.

A local directory, however, places the total population at 277,680. According to the lower estimate, Vancouver brought in a population of 142,150, South Vancouver 45,500, and Point Grey 33,233. Thus this city, in the year ended in December, 1927, has reached a position where it lays claim to being Canada's third city. The next Dominion census will officially place the honor as between Vancouver and Winnipeg.

Sold Into Slavery

Chinese Women and Girls Sold, Owning To Famine Conditions

Peking.—The Rev. F. J. Griffin, of the Church of England mission at Tatuming, in the province of Shanxi, has reported to the international famine relief that more than 17,000 women and girls of the new province of Sulyan have been sold because of famine conditions.

"Many villages have been stripped of women and girls who were sold into slavery," he reported. More than 17,000 have passed through the Yenmen Pass, the main highway into Inner Shanxi, and were sold for approximately \$100,000 gold.

Brigades were active, he said, adding to the destitution by capturing a caravan of a thousand camels loaded with rice for the famine-stricken people.

Was Pioneer Railroad Builder

Pat Welch, Well Known In West, Dies In California

Spokane, Wash.—Pat Welch, 70, member of the firm of Stewart and Welch, railroad builders, died recently at Coronado, California, a telegram to relatives here said. Mr. Welch, who had gone to California for his last summer, had been ill for nearly four years.

Associated with Major General Allan Stewart, of Vancouver, B.C. Welch had a part of the construction of many railroads in the north-west with General Stewart, held many contracts in the United States, Canada, Great Britain and Africa.

To Preserve Niagara Falls

Treaty Is Signed Between Canada and United States

Ottawa, Ont.—The construction of remedial works in the Niagara River designed to distribute the water so as to ensure at all times unbroken crentines on both Canadian and American Falls, is provided for in a treaty between Canada and the United States which was signed at the office of the Prime Minister here.

In addition to providing for the construction of these works, provision is also made that each country may divert an additional 10,000 cubic feet of water per second for power purposes. These diversions will be permitted only "during the winter or non-tourist season, beginning on the first day of October and ending on the 31st day of March of the following year."

The treaty was signed by Right Hon. W. L. Mackenzie King, acting in the capacity of plenipotentiary for his Majesty the King, and by Hon. William Phillips, United States minister to Canada, as plenipotentiary for his government.

Early Seedling

Marquis Wheat Sown At Indian Head On January 2nd

Indian Head, Sask.—Saskatchewan in past years has been noted for the creation of records, some of them strange and unusual, and on the second day of 1928, another was added, that will stand for many years.

This was the seeding of spring wheat, five acres of Marquis being planted on an experimental plot at the experimental station farm. At 10 o'clock, the superintendent ordered his men and teams out, and according to instruction given Wednesday afternoon, the five acres were seeded before dinner.

The land, summer-fallow, was in excellent shape, and the wheat was buried to quite a depth.

Prisoners Help Fund For Distressed Miners

Heard Appeal Made By Prince On Behalf Of Welsh Strikers

London, Eng.—Evidence is fast accumulating of the added impetus given the lord mayor's fund for relief of families of distressed miners by the personal appeal of the Prince of Wales broadcast by radio on Christmas Day. The fund now amounts to nearly £2,000,000 exclusive of the governmental contribution which is to double it.

The governor of a certain prison, who sent along \$55 "from the prisoners who heard the Prince." Many letters received at the headquarters of the fund, the Mansion House, are addressed to the Prince personally.

British Members Nominated

London, Eng.—The British government has nominated Sir Josiah Stamp and Lord Revelstoke as the British members of the project committee of experts on reparations. The names of the two deputy members will be announced later.

HEADS NATIVE SONS

Dr. James Cotton, president of the Native Sons of Canada, who expressed fear that Canada's new immigration agreement with Britain may bring too many settlers here, thereby increasing unemployment and driving Canadians to the United States.

Langsner Leaves Canada

Man Who Investigated Ambrose Small Case, Has Gone To West Indies

Toronto.—Dr. Adolph Maximilian Langsner, who investigated the Ambrose Small case here, some weeks ago, has gone to the West Indies, and later will go to Mexico. These sections are presumably more sympathetic to his theories and methods than Canada, whose authorities, according to his own statement, exhibited a disinclination to renew his immigration permit as a visitor in this country.

As on his previous departure from Toronto, he promises to return, make sensational disclosures regarding the Small case, and "solve the mystery in spite of all they can do."

Influence was brought to bear by his enemies and opponents in the Small case, he said, before his departure, with the object of preventing him continuing his investigation of the mystery.

Senate Editor To Retire

Albert Horton Quits Office After Fifty Years' Service

Ottawa.—After half a century of service, Albert Horton, editor of Senate Debates in Canada's parliament is to retire shortly. It was announced recently. He will be succeeded by David Halpin, at present of the Senate Hansard staff.

Mr. Horton has been a familiar figure on parliament hill since he was brought here in 1877 by Hon. George Brown, to report the proceedings in the Senate for the Toronto Globe.

New Air Marshal Appointed

London, Eng.—Sir John Marshall Salmon, air marshal, has been appointed chief marshal of the Royal Air Force in succession to Sir Hugh Trenchard, who resigned December 20. Sir John Frederick Higgins, air vice-marshal, will be promoted to Sir John Salmon's rank.

FAVORITE PHOTOGRAPH OF PRINCE

Here is reproduced a photograph of the Prince of Wales which was taken from the Illustrated London News. This picture is declared to be the last ever secured of the young man who recently returned from the big game hunts of Africa to the sick room of his father, King George.

Would Establish Health Units In Each Of The Provinces

Dominion Has Quarter Million Radio Sets

Over Sixty-Three Thousand Are In Western Provinces

Montreal.—The Gazette carries the following Ottawa special: "More than a quarter of a million Canadians owning radio receiving sets had paid the government tax of \$1 up to the end of November, an increase of 17,000 as compared with the end of November, 1927. It is believed, however, that more than 100,000 radio fans in the Dominion are dodging this little tax."

The health tax goes on to say that it would not be surprising if the radio commission, after its European tour, recommends an increase of private fees and the establishment of powerful Federal or Provincial broadcasting stations at Canada-wide points.

The dispatch shows the following radio license issues during the past two years in the western provinces:

	1927	1928
Manitoba	14,103	14,701
Saskatchewan	18,713	20,218
Alberta	9,362	10,963
B.C.	14,608	17,361
N.W.T.	47	32
Yukon	3	31

Canada's Trade With U.S.

Best Customer Last Year Says Bulletin Issued At Washington

Washington, D.C.—Canada literally purchased a little of everything American manufacturers had to offer during the last ten months of 1928, and may have "bought the Brooklyn Bridge" if Uncle Sam offered such a structure for sale.

This makes the substance of "our world trade," says a bulletin issued by the foreign commerce department of the Chamber of Commerce of the United States. It stated that the Dominion was the best customer of the United States during the designated period.

Change Name Of Ancient City

Peking, China, Now To Be Known As Peking

Peking, China.—The Nanjing government, chief of the ancient city has changed the name of the ancient city of Peking, which is now known as Peking.

The name Peking signified "Northern Capital," and the Nanjing government did not wish that meaning to be applied to the city from which Northern arms had been driven.

Since the first spelling adopted was "Peking," pronounced "Tay Pien" and meaning "Northern Peace." It was later ruled that Peking would be correct.

Federal Parliament Will Assemble On Thursday, Feb. 7th

Ottawa.—Parliament will open on Thursday, February 7. Official announcement to this effect was made recently by Premier King, at the conclusion of a meeting of cabinet members.

The Prime Minister stated that no appointments to governmental vacancies were made at the sitting of the cabinet.

Hon. R. B. Bennett, Conservative leader, who is now in Europe, will return to the capital about the middle of this month. Mr. Bennett sailed for England two weeks before Christmas on a brief holiday prior to the opening of parliament.

Political prognosticators forecast that the session opening next month will be much livelier than the previous one. With occasional rumors in the air of a possible general election next fall, the likelihood is that debates in both the commons and the senate will be somewhat more spirited.

No intimation has been made in official circles, though, on the possibility of an election this year. Two general elections have been held in the Dominion during the past few years, one in 1925 and the last one in 1926; and there are many political observers who lean towards the opinion that no further appeal will be made to the people before 1930.

Ottawa.—Establishment of health units at various points in each province of the Dominion is under consideration, Hon. J. H. King, minister of pensions and national health, stated. Discussions had taken place, Dr. King stated, between Dominion and several provincial health authorities in the matter.

The proposal under contemplation would involve payment of a subsidy from the Dominion exchequer towards the cost of these units, which would operate under the health department of the governments of the several provinces. The amount of such subsidies, Dr. King said, had not been determined, tentatively or otherwise, as yet.

Location of the suggested health units throughout Canada, Dr. King declared, had nothing whatever to do in any manner, shape or form, with the prevailing influenza epidemic. Cases of influenza, Dr. King stated, were matters entirely to be dealt with by provincial and local authorities.

Mystery Of "Crank" Letters Cleared Up

Were Traced To Clerk In New York Post Office

New York.—The arrest of Abraham Rosenberg, 27, a clerk in the main post office here, has cleared up the mystery of "crank" letters received in the last few years by President Coolidge, Vice-President Dawes, former Governor Smith, and other national figures, postal authorities announced.

Postal inspectors said they found 1,700 letters, all of a threatening nature, at Rosenberg's home.

Rosenberg dropped his last letter down a chute in the main post office. It was traced to him and the threatening letters were found in his home. Rosenberg, postal men say, threatened "action" after such developments as the sinking of the submarine "S-4."

Students May Make Change

Toronto.—The scheme whereby University students may exchange from one Canadian university to another for one year of the course will come into effect in 1929, according to J. L. Green, president of the National Federation of Canadian University students which recently held its annual convention at Kingston.

France Officially Represented

Ottawa.—For the first time in the history of the Quebec legislature, France was officially represented at the opening of the provincial parliament when J. Gauthier, in January, His Excellency Jean Knight, French Minister plenipotentiary who recently arrived in this country, attended.

The budget, it is understood, will be brought down early during the coming session. Presentation of this document, containing as it does the government's fiscal policy with any changes to be made in the tariff, is always eagerly awaited.

Indications are that the coming session of parliament will run well into June. While the legislative program of the government has not been indicated, a number of important changes to legislation may possibly be introduced in this case during the session. Premier J. C. Gauthier, of Saskatchewan, is due to arrive in the capital early next month to discuss the question of the early return of natural resources to his province.

The whole question of the stimulation of immigration to Canada will likely receive attention.

British Commonwealth of Nations Makes For Greater Security And For Peace of the World

One thing at least, is certain—that within fifty years the British Empire has entirely changed its character. It can no longer be regarded, as perhaps it was possible to regard it at the time of Queen Victoria's Jubilee, as a sort of superstate, like any other political unit, but greater and stronger and fiercer. It has become rather a league of sovereign, independent states, owing allegiance to a common tradition and a common crown, but each self-governing, and each the master of its own destiny.

In foreign affairs the British Empire must be considered as having a double relationship; the constituent parts are free to make whatever arrangements they think fit with foreign nations regarding matters which are the peculiar concern of each, while the empire as a whole regulates those relationships which are the concern of the whole.

It might seem to a superficial view that the British Empire has been weakened by these changes which have been brought about in its internal relations during the reign of King George, but in reality it has been immeasurably strengthened. "The second empire," the Divanical ideal of a superstate, was obviously and rightly unsound in modern conditions, and as each dominion increased in power and prestige, as each part of the empire evolved its complete nationhood, the strain of its relationship with the mother country would sooner or later have brought the whole fabric to collapse.

But in the third empire the dominions are no longer, in fact or in theory, under the tutelage of the mother country. Each nation in the British Commonwealth of Nations is the equal in status of the other, and there is no longer any prospect of the collapse of the empire, since the potential causes of such a collapse have been removed.

And if the ideas implicit in the British Commonwealth of Nations mean greater security for the world, the British Empire they mean equally greater security for the peace of the world. In the days when the British Empire straddled the globe as the personal appendage, more or less, of the United Kingdom, it was inevitably the object of suspicion or envy on the part of other nations.

But today the empire is no longer simply a piece of real estate on an unprecedented scale; it is a league of nations, bound together by the ties of language, of common outlook and tradition and by self-interest. Fifty years ago, perhaps, the British Empire might be regarded as a nuisance to the peace of the world, but today it gives the world the example of half-a-dozen great and powerful nations pursuing peaceably their peaceful ends without war and without even the possibility of war between them.—Richard Law in the New York Herald Tribune.

Moose Jaw Foxes For California
From an original two pairs of silver foxes obtained from the Moose Jaw Silver Fox Company, Limited three years ago, Wellington White has started a silver fox farm at Ronda Beach, California, with 17 pairs of foxes. They were shipped from Moose Jaw by the company to form the nucleus of a large ranch in the western state.

Farm Livestock in Canada
The number of farm livestock in Canada as in June, 1928, is estimated as follows: milk cows, 5,700,000; total cattle, 8,703,272; sheep, 3,415,718; swine, 4,497,587; hens and chickens, 49,692,882; turkeys, 2,065,770; geese, 125,647; ducks, 185,540; total poultry, 63,779,530.

"Peter, you have shaved off your head."

"Yes, but how did you know?"
—Burn Horn, Madrid.

The Question Of Diet

Necessary To Know How To Eat In Order To Be Healthy

In order to be healthy and to enjoy long life, it is necessary to know how to eat. The question of what to eat does not enter into this phase of health procedure. According to the health specialists, the majority of people do not know how to accomplish this, and the result is that they suffer from various minor illnesses and in any event suffer discomfort. The following rules should be adopted by everyone.

1. Never eat when you are tired.
2. Never eat when you are upset by worry or excitement.
3. Never eat when you are going to do things that are upsetting.
4. Eat sparingly, surprising you like when you are hungry.
5. Do not think you must have your meals per day.
6. Do not force a child to eat when he does not want food.
7. Keep a child out of mealtime as much as possible.
8. Do not scold him at mealtime.
9. See to it that he gets plenty of rest.

CHAPTER 11.—Continued

For hours Donald followed the black tracks through the mill, while the fat fellow explained and tested the different notes.

Once a week Robert Rennie came to the mill, taking a keen interest in all phases of its construction, and invariably he went away with a pleasant smile on his face.

"Never saw the old man so worked up," commented Gillis. "Guess he'd like to come up here and run her himself."

Rennick was still skeptical. For no apparent reason he had taken a dislike to Donald. "It's just 'cause you and I are such good friends," explained Gillis. "Me and him get on like a couple of strange bull-dogs."

When the huge three-storied mill, with its dry kiln, lumber sheds, conveyor belt and railroad spurs, was ready for operation, and each machine had been tested, Robert Rennie arrived with other officials of the company. Next morning Donald's heart thumped as the mill's big whistle sent out its first call to work and the men filed eagerly to their posts.

The logs were sprayed with huge water-jets as they came up the chain-belt to clear them of gross debris. The electric "nigger" spun them about and threw them out to place with a thud that shook the mill. Then in a wild crescendo of sound there rose the harsh chorus of saws: the singing howl of the cut-off, the stentorian, slurring sound of the grange saws, and the intricate snarl of the trimmer.

Smiling and rubbing his hands, Robert Rennie walked through the mill. "Running like a greased pig," shouted Gillis above the clamor. The owner of the R. C. & L. Co. so far forgot his discomforts that he astonished Gillis heartily on the back.

Donald noticed an ever-increasing irritability on the part of the logging foreman during the next week. The erstwhile jocular Gillis became sulky and morose. Donald got an inkling as to the cause of his friend's gloom when he heard Gillis in conversation with Andy.

"What the 'lira the matter, you big hunter? You're like a bear with a sore foot," complained Andy.

"If my gang don't get here pretty soon, and I have to put up with this crowd of loblaws much longer, I won't be fit to live right," growled Gillis.

Short of Breath Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over six years I have been troubled with smothering spells and shortness of breath, and it was quite possible for me to walk, even a short distance, because of the choking sensation which followed."

After trying many treatments, in vain, I at last decided to try

Gillis's gang of "rednecks" were known the length and breadth of British Columbia. Employers bid high for their services, but for many years they had stuck loyally with Gillis and the R. C. & L. Co. At present they were employed by the Company in one of the camps up the coast, but at Gillis's earnest request, Robert Rennie had promised to send them to Summit Lake.

That night Gillis's band of well-earned reputation of being the wildest crew of lumber jacks west of the Rockies. "They're wild, all right," Gillis had admitted; "a swearing drinkin', fightin' gang of roughnecks. But hush! mackerel! How them boys come down town for the night."

That holy Mikes! Gillis's band of well-earned reputation of being the wildest crew of lumber jacks west of the Rockies. "They're wild, all right," Gillis had admitted; "a swearing drinkin', fightin' gang of roughnecks. But hush! mackerel! How them boys come down town for the night."

Sighing reminiscently, he continued: "I often wonder if it's because I'm gettin' old, but, you know, when I look back on the days, when we logged with him team, it seems to me that the men at that time liked to work."

"I can still see the old timers in their whickers, and their black hats and flannel shirts, as they come jokin' for the mill," said the Cussler. He shook his head sadly. "Ah! there was one kind of logger in them days."

"Being that Donald was interested, he went on: "Yes, there were two kinds of loggers nowadays. One, the double-breasted, and there's a hell of a lot of difference between the two. The 'single-breasted' logger is a man who'll speak anything but English, and he'll not be doing the 'lira' work's neither. He knows loggins from A to Z, don't mind sleepin' in a bunk, and always carries his six-shooter. If he borrows a ten-spot off you, as soon as he earns it he goes back to you, you slip you the money, grab you by the hand, and lookin' you straight in the eye, says, 'Thanks, friend, come and have a drink'! At night, when he is through work, he'll smoke his pipe, grind his axe, talk about the next day's work with the foreman, and go to bed. In the mornin' he'll swallow a big load of prunes and ham and eggs and go to work a-singin'."

"The 'double-breasted' logger," he snorted disgustedly, "he's a mixture of a taxi-driver, bartender and social orator, and just because he has a six-shooter, when he is through work, he'll smoke his pipe, grind his axe, talk about the next day's work with the foreman, and go to bed. In the mornin' he'll swallow a big load of prunes and ham and eggs and go to work a-singin'."

"The 'double-breasted' logger," he snorted disgustedly, "he's a mixture of a taxi-driver, bartender and social orator, and just because he has a six-shooter, when he is through work, he'll smoke his pipe, grind his axe, talk about the next day's work with the foreman, and go to bed. In the mornin' he'll swallow a big load of prunes and ham and eggs and go to work a-singin'."

"When he gets through at night," he said, "he'll clean his fingernails and polish on a mandolin while he tells how many Jaws is stuck on him in Vancouver. Give an opinion that the shaver-lath was not hot enough, and how we sufferin' workers should rise against the capitalists. He'll kick at the breakfast table because there is only oranges and no grape-fruits. When he goes in the woods he'll throw a few tows away so to help the cause of the workers."

"Workers!" he exploded, as he came to his feet and walked the floor, "we've got many 'double-breasted' and 'single-breasted' loggers now, Donnie. A punk will work if you show him a buck and shovel, but the other guys are trouble-makers. Did you see that big brute that came in today?"

Donald remembered seeing an enormous man with narrow, pig-like eyes, in the crowd of men sent by the employment agency.

"I suppose I'd ought to fire him, but he's a good logger, and they are mighty scarce 'round these diggins," said Gillis sleepily. "Get to the 'lira' and 'lira' for a 'high-lead' tomorrow, so I better hit the hay."

Preparing the "spare-tree" for a "high-lead" or "sky-tree" rigging, is the most spectacular and thrilling performance in the logging industry. A standing tree is trimmed of its top and branches, then strengthened with guys. With the pull coming from this altitude, the advantage over the straight ground pull is enormous as logs are lifted high in air over all impediments. The men who do this hazardous work are known as "high-lead-ers."

Next morning, a man with a short-

FLIES are quickly Soothed & Healed by TAM-BUK

handed one, wearing a wide belt to pass around the two-trunk, and a pair of Emsman's spurs, slowly advanced a big fir. As he ascended he trimmed the trunk clear of limbs. Quite a crowd gathered, among them the trapper, with his rifle on his arm.

"I ain't got a 'high-lead' in the cuttin'," growled Gillis the first to speak. "This fellow agreed to trim her, but he says he never chopped the top off one, so, even well dynamite her."

The explosive, with a detonating cap, was tied around the top of the tree and wires strung to the ground for some reason the batteries would not, and Gillis clanked under the delay.

"I kin set her off for ye," said the old trapper, who turned to him. "How?" The trapper tapped his gun. "Put a piece of paper on the cap so I kin see her and I'll pop it."

"That's a new one on me," laughed Gillis.

He sent the man aloft to place a square piece of pasteboard on the cap. The men moved back from the foot of the tree, and Gillis gave the signal. The air was clear. The old man sprang briskly to the top of a stump, tipped his big hat to the back of his head, and raised his rifle aloft.

For an instant the long barrel waved slightly, then steadied. The report of the rifle was drowned by a great crash, and a heavily branched top lifted, then came hurtling through the air to strike the ground a mass of wreckage. For a moment the big spruce lay dead, only from the shock, then stood straight and rigid. Deprived of its fronds of foliage, it appeared a ghastly relic of its former self.

That afternoon, as they waited the arrival of the train, Gillis talked of the "red-necks" and "white men, every one of them," he declared proudly, "and everyone of them with a nickname that is known all over the Coast." "Ye just ought to see my two 'high-lead-ers,' 'Hoop-la' McKenzie and 'Blackie' Anderson. 'Blackie' is as black as an Indian, and 'Hoop-la' got his name from standing on the top of a spar tree, after he cuttin' her off, wavin' his hat and yellin' 'Hoop-la!'"

"I got five Jack McDermott's in the gang. Their names are 'Zig' Jack, 'Fighting' Jack, 'Check-Buck' Jack, 'Jolimeau-on-the-spot', and 'Crazy Jack' An. If they had all his name 'Crazy Jack' it wouldn't hit no mistake," he said, with a chuckle.

The train rumbled to the station and the usual crowd of workers came pouring from the cars, while a crowd stood waiting to board the train. It was the same every day—men coming and men going.

Gillis uttered a glad cry, "Here they are!"

A big, ostentatious man, with broad shoulders and narrow hips, stepped to the platform. His dress was truly colorful and striking—with hat, high boots, a vivid scarlet shirt, with a cloth belt of the same bright hue tied at the side, the ends dangling loosely.

"Get out of the way, hunter, and make room for a logger!" he roared as he elbowed his way through a crowd of scattering foreigners, behind him a line of men clad in the same brilliant attire.

"Hello, Hoop-la! You ornery old skater!" belittled Gillis.

"The big man turned to him with a feller's" he shouted. "Here he is feller's!"

In a moment Gillis was surrounded by this picturesque crew, howling tumultuous greetings.

"Hello, ol' boss!"

"Hello, you son-of-a-gun!"

"Here he is feller's!"

Donald was subjected to crushing handclaps as he was introduced to each and every one of this crowd of high-lead-ers.

As Donald studied them he did not wonder at Gillis's pride in them.

Next morning, a man with a short-

With the exception of Blackie, there was none under six feet in height, and they carried themselves with a loose swing that was almost a swagger. Many of them wore a wide middle age, some quite grey about the temples. They were all filled with the sparkling health of the great outdoors, their skins the color of mahogany.

TOOTH EXERCISE

You have read considerable of late about the "daily dozen," and other such setting-up exercises.

You know, of course, that the body requires exercise if it is to develop properly.

You have been told, too, that a vigorous chewing of your food is both beneficial and necessary as the first step in good digestion.

But you know, of course, that the body requires exercise if it is to develop properly. You have been told, too, that a vigorous chewing of your food is both beneficial and necessary as the first step in good digestion.

But you know, of course, that the body requires exercise if it is to develop properly. You have been told, too, that a vigorous chewing of your food is both beneficial and necessary as the first step in good digestion.

To Check Flu-Grip

Fight the Germs with Vapors
Before They Can Get a Start

Treat All Colds Promptly
But Be Careful Not to
Disturb the Digestion
With Too Much Dosing

While Flu is so prevalent everyone should take precautions to prevent its further spread. Flu is generally accompanied by a headache, burning eyeballs, and aching joints. But it begins so many times with just an ordinary cold.

Too often, the colds are neglected until they have lowered the vitality and permitted the lurking germs of influenza, or pneumonia to "get a foothold."

The only safe plan is to attack a cold at the very start. A hot bath, a laxative, and a vigorous application of Vicks VapoRub on the throat and chest at bedtime, will usually break up a cold overnight.

External Treatment Best For hours after Vicks is applied, its ingredients, time-tested remedies, such as camphor, menthol, eucalyptus, thyme and turpentine, are vaporized by the warmth of the body, and inhaled right to the inflamed air passages. At the same time, the menthol acts

through the skin like an old-fashioned poultice, "drawing out" too much "sting" is so apt to do. This is doubly important when "flu" is around, for your stomach, as well as your respiratory organs, must be kept in good condition in order to keep your body resistance at its highest level.

For this reason, too, mothers prefer Vicks for children. It can be used freely and often, even on the youngest child, with no fear of upsetting a delicate stomach.

To Help Ward Off the Flu When influenza colds are prevalent, you can often prevent infection by sniffing a little Vicks well up the nose every night and morning, or before exposure to crowds.

VICKS VAPORUB

OVER 15 MILLION JARS USED YEARLY

Newly Arrived Missionary: Tell me what became of the man who had this position before me?

"Casualty," Chief (putting him on stomach with reminiscent grin). He took a trip to the interior.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Best In Every Home Where There are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulates the bowels, sweetens the stomach, drives out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the newborn babe, as they are absolutely guaranteed free from opiates or any other injurious drug.

Opportunities come teaching out their hands to us every moment, not to do great things perhaps, but for the "Little, daily, unremembered acts of kindness and of love," that make the difference between a mediocre matter-of-fact intercourse with one another, and keep our hearts from starvation.—Lucy Larwood.

Hokey players use Minard's Liniment

There is such a thing as being too persistent at times.

Foods Stay Fresh Longer This Way

Excellent For Croupy Children.

When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer.

It is equally reliable for sore throat and chest, scarlet, rheumatic pain, and other ailments.

Thomas' Electric Oil is regarded by many thousands as the most responsible of the family medicine chest.

A Berlin haberdashier advertises his matrimonial troubles in a local paper: "My pious, faithful wife has departed from me. Will the honorable under please keep her?"

Always keep Minard's Liniment handy.

Notable Rocky Mountain Pass

Jarvis Pass, a desolate, highland crossing on the Alberta-British Columbia interprovincial boundary, is remarkable for containing a number of small lakes on its summit, discharging into both sides of the watershed.

The water from some of the lakes flows westward to the Pacific, and from the others it runs eastward to the Atlantic.

Santa Claus should be spelled Santa Klaws. The name is Dutch for St. Nicholas.

Experiences is what one gets while looking for something else.
